Professional Summary

Senior Frontend Developer with **9+ years of experience** designing and developing scalable, high-performance web applications using **React.js, Next.js, Angular, Vue.js**, and **TypeScript**. Specialized in fintech, trading platforms, real-time dashboards, and enterprise applications. Proven expertise in building responsive user interfaces, API integrations, performance optimization, and leading frontend initiatives. Strong experience collaborating with cross-functional teams and mentoring developers to deliver enterprise-grade solutions.

Employment History

Senior Frontend Developer, Trive International, Dubai

October 2025 — Present

- Lead frontend architecture and development of Forex/CFD trading platforms supporting thousands of active traders, using React.js, Next.js, and TypeScript
- Architected a library of 20+ reusable components, significantly cutting new feature development time
- Built real-time trading dashboards handling high-frequency WebSocket price updates with minimal latency
- Reduced page load time by 40% through code-splitting, lazy loading, and bundle optimization
- Own frontend technical decisions across a team of 3-5 developers, including code review standards and architecture reviews
- Partnered directly with product and backend teams to ship new features on a regular release cycle, integrating REST and WebSocket APIs for live market data

Key Achievements:

- Developed real-time market data dashboards and reusable component libraries, accelerating feature delivery and improving development efficiency.
- Improved application performance and reduced page load time by 40%.

Senior Frontend Developer, CPT Markets, Dubai

March 2021 — September 2025

- Developed and maintained global trading platforms using React.js, Next.js, and Vue.js.
- Implemented multilingual support (i18n) for international users.
- Built interactive analytics dashboards using Highcharts.js.
- Integrated REST APIs, WebSocket services, and third-party financial systems.
- Worked closely with UX designers and backend teams.
- Mentored junior developers and improved code quality standards.

Key Achievements:

- Implemented multilingual support across global markets.
- Improved development productivity through reusable UI components.
